

Whitepaper

Turbo ETH is a HIGH ROI staking project where you can stake ETH (Arbitrum) and receive returns on your ETH after a fixed number of days (*as per your plan*)

Safety

Our smart contract has been hard-coded with an anti-rug pull mechanism, making sure that your funds remain safe. Not even the project owners have the access to withdraw funds from the smart contract. The funds can be withdrawn ONLY by the users after their respective plans come to maturity.

We believe in full transparency, so we made sure that all investment plans, daily earnings, ROI and staking period are clearly listed before you choose to stake your ETH.

The fees are clearly outlined below. There are no hidden fees or re-routing of funds.

Staking Plans

We have created plans which are simple to understand even if you are new to staking. There are 8 plans in total, spread across 2 categories: **Unlocked and Locked plans**.

INVEST FROM

0.003 ETH

No max limit

*Note: ETH will be staked on
the Arbitrum Chain

Unlocked

11% to 313%

ROI in 12 - 26 days

Locked

21% to 546%

ROI in 12 - 26 days

Unlocked Plans

In this plan you will earn a daily fixed percentage (as per your plan) against your staked ETH.

Staking Period	12 Days	16 Days	22 Days	26 Days
Daily Earnings	10.98%	11.43%	11.78%	12.04%
ROI	131.76%	182.88%	259.16%	313.04%

12 Days

Daily Earning

10.98%

Total Return

131.76%

Enter Amount ETH

Stake ETH

 withdraw anytime

Day	ROI	Day	ROI
1	0.1204	14	0.1204
2	0.1204	15	0.1204
3	0.1204	16	0.1204
4	0.1204	17	0.1204
5	0.1204	18	0.1204
6	0.1204	19	0.1204
7	0.1204	20	0.1204
8	0.1204	21	0.1204
9	0.1204	22	0.1204
10	0.1204	23	0.1204
11	0.1204	24	0.1204
12	0.1204	25	0.1204
13	0.1204	26	0.1204

Unlocked Plans

Example:

If a user invests 1 ETH in the 26 days unlocked plan, then 12.04% of 1 ETH (0.1204 ETH) will be available for withdrawal every day for the next 26 days. After 26 days a total of 3.1304 ETH will be available for withdrawal.

The Day the user invests it will be considered Day 0

Day 1 **12.04% of 1 ETH = 0.1204 ETH**

Day 2 **12.04% of 1 ETH = 0.1204 ETH**

Day 3 **12.04% of 1 ETH = 0.1204 ETH**

Day 4 **12.04% of 1 ETH = 0.1204 ETH... ..and so on till Day 26.**

After 26 Days, the total ETH for withdrawal will be 3.1304 ETH with a total return of 313.04%

*In unlocked plans, you can withdraw your daily earnings once every day.

Locked Plans

The locked plans also consist of 4 plans:

Staking Period	12 Days	16 Days	22 Days	26 Days
Daily Earnings	21.08%	29.56%	16.99%	15.36%
ROI	172.84%	285.20%	437.08%	546.72%

12 Days

Daily Earning	Total Return
21.08%	172.84%

 at the end

Day	ROI	Day	ROI
1	0.15	14	0.98
2	0.17	15	1.13
3	0.20	16	1.30
4	0.23	17	1.51
5	0.27	18	1.74
6	0.31	19	2.01
7	0.36	20	2.31
8	0.41	21	2.67
9	0.48	22	3.08
10	0.55	23	3.56
11	0.64	24	4.10
12	0.73	25	4.73
13	0.85	26	5.46

Locked Plans

The daily earnings of the previous day will be compounded into the next day.

Example:

User invests 1 ETH in the 26 days locked plan.

The Day the user invests it will be considered Day 0

Day 1 **15.36% of 1 ETH = 0.15 ETH**

Day 2 **0.15 + (15.36% of 1.15) = 0.17 ETH**

Day 3 **0.17 + (15.36% of 0.17) = 0.20 ETH**

Day 4 **0.20 + (15.36% of 0.20) = 0.23 ETH...** and so on till *Day 26*.

After 26 Days, the total ETH for withdrawal will be 5.46 ETH with a total return of 546.72%

*In locked plans, you can withdraw your total earnings only after your plan matures.

Day	ROI
1	6.048
2	6.048
3	6.048
4	6.048
5	6.048

Reinvest Plan

'Reinvest' is a 5 days locked plan where you can get 35% daily interest

Example: User had invested 10 ETH in the 12 days locked plan and 17.28 ETH is available for withdrawal. If the user chooses to reinvest that amount into the 5 days locked plan then he gets 35% daily interest.

The Day the user invests it will be considered Day 0

Day 1 **35% of 17.28 ETH = 6.048 ETH**

Day 2 **35% of 17.28 ETH = 6.048 ETH**

Day 3 **35% of 17.28 ETH = 6.048 ETH**

Day 4 **35% of 17.28 ETH = 6.048 ETH...** and so on till *Day 5*.

After 5 Days, the total ETH for withdrawal will be 30.24 ETH with a total return of 302.4%

*In the reinvest plan, you can withdraw your total earnings only after your plan matures, that is, after 5 days

Hold Bonus

There will be a 'hold bonus' feature for users who do not withdraw their ETH.

The bonus will be 0.3% every day. The bonus may increase maximum upto 3%. If the user holds the earnings and does not withdraw, he will get 0.3% bonus every day for not making a withdrawal. If the user withdraws, the 'hold bonus' will reset to 0.

Example:

A user deposits 100 ETH in 12 Days unlocked plan and is receiving 10.98 ETH every day.

Day 1 **10.98 ETH**

Day 2 **(0.3% of 10.98 ETH) + 10.98 = 11.01294**

Day 3 **(0.3% of 11.01294 ETH) + 10.98 = 11.013038**

Day 4 **(0.6% of 11.013038 ETH) + 10.98 = 11.046078**

Day 5 **(0.6% of 11.046078 ETH) + 10.98 = 11.046276**

Day 6 **Suppose the user withdraws on this day, then 'hold bonus' will reset to 0 and Day 6 earnings would be 10.98 ETH**

*For locked plans, the user will get a 'hold bonus' only after the ETH is available for withdrawal, that is, only after the timer has ended.

Fees

There will be a fixed fee for every deposit and withdrawal.

(These are owner fees and will be used for marketing purposes to ensure the longevity of this project.)

Deposit Fee: 9%

Withdrawal Fee: 3%

Reinvest Fee: 6%

Force Withdraw

This function lets you withdraw your initial investment and acts like a stop-loss.

Even if there is time remaining for a locked plan to end (assume 8 days remaining), the user can use the 'force withdraw' function to withdraw their original deposit amount. In this case, **withdrawal fee of 36% will be charged.**

Out of this 36%, 24% will stay in the contract and 12% will be the owner fee.

Example:

User invests 10 ETH in 22 days locked plan. User will get back 6.4 ETH (10 ETH - 36%).

*This function is available only for 22 & 26 days of Locked plans and the 5 days Reinvest Plan.

Referral Systems

Refer to your friends, and for every deposit and withdrawal they make, you will get a fixed commission.

*You can see your referral link after connecting your wallet.

Deposit Commissions:

Level 1: **5%**

Level 2: **3%**

Level 3: **1%**

Withdrawal Commissions:

Level 1: **1.5%**

Level 2: **0.5%**

Level 3: **0.1%**

***Note:** To be able to withdraw your earnings from referrals, you need to make at least 1 deposit.

Level 1:

If the person you referred to makes a deposit, then it is considered Level 1. You will receive 5% of their deposit value.

Level 2:

If the person you referred to refers another person and that person makes a deposit, then it is considered Level 2. You will receive 3% of their deposit value.

Level 3:

If that other person then refers to someone else and that person makes a deposit, then it is considered Level 3. You will receive 1% of their deposit value.

Strategies

1. We recommend staking 60% into 26 days unlocked plan and 40% into 26 days locked plan. In roughly 14 days you will get your initial investment back, if you withdraw your earnings daily from 26 days unlocked plan. Earnings from rest of the term is all profit.
2. Stake in any of the unlocked plans and daily reinvest your earnings. In roughly 11 days you will get your initial investment back.
3. You will be getting NFT airdrops depending upon how much ETH you have staked in any of the plans. Divide the number of NFTs you receive with your total number of ETH staked. Set that value as the sale price for all of your NFTs.

For example: You staked 1 ETH in 26 days unlocked plan and received 5 NFTs for it. So the sale price of your NFT should be 0.2 ETH (1 ETH / 5 NFTs). Get your initial investment back from any of the above strategies and the ETH you get from selling the NFTs is pure bonus.

As long as there are funds in the contract you will be able to make withdrawals.

NFT Airdrops

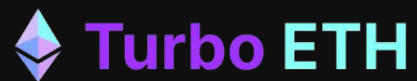

Get up to free 12 NFT airdrops from the Turbo ETH Collection exclusively for the users who stake their ETH on the Turbo ETH portal.

Enter the ETH amount in any of the locked or unlocked plans to see how many NFT airdrops you would get for staking your ETH. Alternatively you can check the NFT airdrop chart.

The Turbo ETH NFT collection will have a max supply of 10k NFTs. After all the airdrops are completed, the remaining NFTs will be burned on May 21st 2023.

*NFTs will be airdropped 10 days after staking the ETH
